

OPEN SCHOLARSHIP INITIATIVE

BETTER DATA PRACTICES FOR RESEARCH

ABOUT OUR WORKSHOP

Effective data management supports research integrity, reproducibility, and the long-term value of data. This workshop will use hands-on activities to introduce practical approaches for implementing better data practices across the research lifecycle — from organizing and describing data during active projects to preparing data for sharing and reuse. Topics will include directory structures and file naming conventions, copyright considerations for research data and code, and documentation formats such as data dictionaries, metadata standards, and README files.

MARCH 27TH 2025

Thursday | 8:30 AM - 3:00 PM

Dewey Room, Pattee Library, University Park
